

Please add the following new claims 53-64:

1 53. (Newly Added) A digital camera according to claim 52, wherein said
2 picture information is printed from said memory when said memory is separated
3 from said digital camera.

1 54. (Newly Added) A digital camera comprising:
2 a memory which is separable from said digital camera;
3 a picture capturing unit for capturing picture information corresponding to an
4 image and for storing said picture information in said memory;
5 a display unit for displaying an image derived from said picture information;
6 a control information processor for signaling to said memory how said image
7 derived from said picture information is to be rotated during printing said picture
8 information, said signaling initiated after said picture information is captured.

1 55. (Newly Added) A digital camera comprising:
2 a memory which is separable from said digital camera;
3 a picture capturing unit for capturing picture information corresponding to an
4 image and for storing said picture information in said memory;
5 a display unit for displaying an image derived from said picture information in
6 said memory;
7 a rotation unit for rotating said image displayed at said display unit and for
8 storing in said memory a rotation control information indicating how said image is
9 rotated; and
10 a control information processor for storing in said memory a print control
11 information indicating how said picture information is to be printed, said picture

12 information being printed from said memory when said memory is separated from
13 said digital camera.

1 56. (Newly Added) A digital camera according to claim 52, wherein a
2 rotation angle of said image displayed at said display unit is changed by 90 degree
3 upon actuating said rotation unit.

1 57. (Newly Added) A digital camera according to claim 53, wherein a
2 rotation angle of said image displayed at said display unit is changed by 90 degree
3 upon actuating said rotation unit.

1 58. (Newly Added) A digital camera according to claim 54, wherein a
2 rotation angle of said image displayed at said display unit is changed by 90 degree
3 upon actuating said rotation unit.

1 59. (Newly Added) A digital camera according to claim 55, wherein a
2 rotation angle of said image displayed at said display unit is changed by 90 degree
3 upon actuating said rotation unit.

1 60. (Newly Added) A digital camera according to claim 52, wherein size of
2 said image displayed at said display unit is automatically adapted to size of said
3 display unit when changing said rotation angle.

1 61. (Newly Added) A digital camera according to claim 53, wherein size of
2 said image displayed at said display unit is automatically adapted to size of said
3 display unit when changing said rotation angle.

1 62. (Newly Added) A digital camera according to claim 54, wherein size of
2 said image displayed at said display unit is automatically adapted to size of said
3 display unit when changing said rotation angle.

1 63. (Newly Added) A digital camera according to claim 55, wherein size of
2 said image displayed at said display unit is automatically adapted to size of said
3 display unit when changing said rotation angle.

- F2*
- C'd*
- 1 64. (Newly Added) A digital camera according to claim 56, wherein size of
2 said image displayed at said display unit is automatically adapted to size of said
3 display unit when changing said rotation angle.
-
